

POWERPROTECT Standby Generators

RESIDENTIAL STANDBY GENERATORS SPECIFICATIONS

More power than ever before. The 26kW¹ is the generator you pick when your whole home needs power and you need peace of mind. This first of its kind generator is powered with a commercial-grade Vanguard[®] engine for reliable, clean power and is designed to keep your home and family running no matter what is causing an outage.

FEATURES

Warranty

6-Year limited warranty of parts, labor, and travel included for the entire term. The industry's most comprehensive warranty over time.²

Industry's Most Powerful

Worry-free backup power with the industry's most powerful air-cooled generator.

Assembled and Engineered in USA

Briggs & Stratton generators are designed and assembled in the USA.³

Commercial-Grade Vanguard® Engine Powerful engine built in the USA for commercial

applications providing power for electronics.

Quiet Weekly Test Mode

70% quieter during weekly test mode.4

Flexible Installation & Maintenance

Approved for installation as close as 18" to a building⁵ with easy toolless panel removal for serviceability and maintenance.

Power Management System (optional)

Customizable to your home's power needs, the Symphony[®] II Power Management system offers prioritized whole house power with a more affordable standby generator.

Corrosion Resistant Enclosure & Base

Automotive-grade galvanneal steel base and aluminum enclosure to resist rust, and powdercoated paint for years of protection against chips and abrasions.

¹ This generator is rated in accordance with UL (Underwriters Laboratories) 2200 (stationary engine generator assemblies) and CSA (Canadian

Standards Association) standard C22.2 No. 100-14 (motor and generators). ² See operator's manual or BRIGGSandSTRATTON.com for complete warranty details.

³ 50% smaller footprint than competitors

⁴ Of global and U.S. parts

⁵ The installation manual contains specific instructions related to generator placement in addition to NFPA 37, including the requirement that carbon monoxide detectors be installed and maintained in your home or business.

⁶ Fuel consumption rates are estimated based on normal operating conditions. Generator operation may be greatly affected by elevation and the cycling operation of multiple electrical appliances – fuel flow rates may vary depending on these factors.

⁷ Per ISO 3744. Sound level measurement at other locations around generator may differ depending on installation, based on lowest microphone at 7m. Normal operation based on average household usage.

Briggs & Stratton has a policy of continuous product improvement and reserves the right to modify its specifications at any time and without prior notice.

This standby generator is not for Prime Power applications.
